

Lecture Notes of Curvature Flows III

Theory of Hamilton's Ricci Flow

by

Laiyuan Gao

Contents

| | |
|---|-----|
| Chapter 1 Introduction | 1 |
| 1.1 Prologue | 1 |
| 1.2 Ricci flow equation | 12 |
| 1.3 Short-time existence | 19 |
| 1.4 Evolution equations | 24 |
| 1.5 Long term existence | 35 |
| 1.6 Maximum principles | 42 |
| Chapter 2 Hamilton-Chow Theorem | 56 |
| 2.1 Normalized Ricci flow | 56 |
| 2.2 Case of $\chi(M) \leq 0$ | 62 |
| 2.3 Case of $\chi(M) > 0$ | 67 |
| 2.4 Uniformization of compact surfaces | 86 |
| Chapter 3 Hamilton 3-D Sphere Theorem | 90 |
| 3.1 Hamilton's advanced maximum principle | 90 |
| 3.2 Hamilton-Ivey pinching estimate | 97 |
| 3.3 Sphere Theorem in 3-D | 102 |
| Chapter 4 Singularity Analysis | 109 |
| 4.1 Singularities of the Ricci flow | 109 |
| 4.2 Singularity model | 109 |
| 4.3 Surgery theory | 109 |
| 4.4 Hamilton Program on Poincaré Conjecture | 109 |
| Chapter 5 Perelman's Contribution | 110 |
